

$\Sigma = \{0, 1\}$ MULTIPLO DI 10 (P.i. 8)

$= \{Q, \Sigma, \delta, Q_0, F\}$

Diagram illustrating the components of a Deterministic Finite Automaton (DFA):

- Q : Stati (States)
- Σ : alfabeto (Alphabet)
- δ : funzione (Function)
- Q_0 : Stati iniziali (Initial States)
- F : Stati finali (Final States)

Additional note: $\rightarrow$ binario in questo (binary in this)
